Name of the Action: E.2. After –LIFE Communication plan

Starting date of the Action: 01/07/2015

Ending date of the Action: 30/09/2015

Short description of the Action

Aim:

Main scope of the action is setting up the strategy for continuation of FLIRE project, in terms of further dissemination of results and functionality of the DSS tool and the early warning systems, which will be produced under the project's life.

Objectives:

- All partners will proceed to promotion activities in order to foster uptake from other interested parties and achieve joint collaborations. Additional funding sources will be sought for the support of early warning system's operation and the continuation of DSS tool functionality. All partners will continue to participate in R&D activities, cooperating with public entities, enterprises and provide work on flood and fire management. Networking activities foreseen under action D.4. will support further life of the FLIRE project. The process of embedding knowledge gained by FLIRE in the teaching activities of the partners will also be included in the After LIFE dissemination activities. **High priority**
- NTUA with the support of all associated beneficiaries will ensure that the project's website will be functional and updated for at least 5 years after the end of the project. **High priority**
- The use of the early warning systems and the DSS by national authorities or other organizations will be a key objective of this action that will secure the after LIFE FLIRE's life. **High priority**
